OSRAM

Light is captivating
 Aqua MINI underwater RGBW fixture

Create magical moments with Aqua MINI.

Light is OSRAM

OSRAM

Turn water and light into emotions

A powerful permanent underwater RGBW fixture.

Breathtaking moments in life are what create the experience we receive, making it worth every minute and every second. When the two main elements of nature: 'water' and 'light' come together and create one of the most amazing experiences, magic simply happens and leaves an unforgettable memory in our minds.

With years of experience in water fountain illumination, OSRAM has created Aqua MINI. A powerful (160W) and highly efficient (>3500lm) permanent underwater RGBW fixture (IP68) which is compliant with CE and ETL regulations. Aqua MINI is the ultimate inspiration for water show designers to make them turn water and light into emotions!

Aqua MINI is easy to transport, install and run thanks to its unique design. It can transform outdoor water fountains, historical fountains, sculptures or newly developed water shows easily and powerfully. This smart luminaire's 6 channels (including adjustable strobe effect) and RDM capabilities provide a lot of functions and advantages such as durability, chromatic reproduction and resistance to being turned on and off continually. Any color is possible through RGB combinations.

Product features and benefits

- Compact permanent underwater fixture (IP68)
- 5 * 4 in 1 LEDs (OSRAM OSTAR Stage)
- 160W power consumption
- 3500lm output
- 24V input voltage
- 10 degree beam angle
- Weight ~4kg
- CE and ETL certification (for USA and Canadian markets)
- Designed for use underwater
- DMX in and out. RDM functions
- Integrated driver
- Available accessories:
IP68 DMX extension cable with male connector on one side and female connector on the other side (5, 10, 25m) IP68 Power extension cable with male connector on one side and female connector on the other side (10, 25m)
- Applications: fountain illumination (small fountains 10-15m height) / water show (not to be used in swimming pools) / Architainment

Aqua MINI underwater RGBW fixture

- Typical Light output of >3500lm
- 5 RGBW multichip (4 in 1) / high power (30W each)
- Transportation and handling savings can be made thanks to its compactness
- Maximum power consumption of 160W when all LEDs are used at 100%
- IP68 rated for permanent underwater use
